

# Production Analytics Tracking Configuration

---

**Date:** November 11, 2025

**Status:**  Complete

**Build:** Successful (173 routes compiled)

---

## Overview

---

Updated all analytics tracking configurations to use production credentials for **cdmsuite.com**, ensuring proper data collection and attribution in the production environment.

---

## Changes Implemented

---

### 1. Google Analytics 4 Configuration

**Previous ID:** G-26P3TRYSWG (Development/Testing)

**New ID:** G-RR0JC3X06W (Production)

- Updated environment variable: `NEXT_PUBLIC_GA_MEASUREMENT_ID=G-RR0JC3X06W`
- Ensures GA4 tracking works correctly on cdmsuite.com
- All pageviews, events, and conversions will now be tracked in the production GA4 property

### 2. Microsoft Clarity Configuration

**Previous ID:** tp19j9wv7x (Development/Testing)

**New ID:** sxd1gemmb6 (Production)

- Updated environment variable: `NEXT_PUBLIC_CLARITY_PROJECT_ID=sxd1gemmb6`
- Session recordings and heatmaps will now be collected in the production Clarity project
- Proper user behavior tracking on cdmsuite.com

### 3. Site URL Configuration

- Added environment variable: `NEXT_PUBLIC_SITE_URL=https://cdmsuite.com`
- Ensures proper metadata base URL for Open Graph and Twitter cards
- Resolves absolute URLs for social sharing previews

### 4. Memory Configuration

- Confirmed Node.js heap size is set to **16GB**: `NODE_OPTIONS=- -max-old-space-size=16384 - -expose-gc`
- Prevents memory exhaustion issues during large PDF processing in bid proposals
- Maintains optimal performance for document extraction and AI generation

### 5. PostHog Analytics

- Confirmed PostHog configuration is correct:
- `NEXT_PUBLIC_POSTHOG_KEY=phc_FCYZaR0wfq1rpcjM36k13ThnX0MPXMvns8x59jStgL4`
- `NEXT_PUBLIC_POSTHOG_HOST=https://us.i.posthog.com`

- No changes needed, already configured for production

## 6. Reddit Pixel

- Confirmed Reddit Pixel configuration is correct:
- `NEXT_PUBLIC_REDDIT_PIXEL_ID=a2_hwf6ymduy5vb`
- `REDDIT_CONVERSION_TOKEN` configured for Conversions API
- No changes needed, already configured for production

---

## Environment Variables Summary

---

All analytics tracking is now configured with production credentials:

```
# Production Analytics Configuration
NEXT_PUBLIC_GA_MEASUREMENT_ID=G-RR0JC3X06W
NEXT_PUBLIC_CLARITY_PROJECT_ID=sxd1gemmb6
NEXT_PUBLIC_POSTHOG_KEY=phc_FCYZaR0wfq1rpcjM36k13ThnXOMPXMvns8x59jStgL4
NEXT_PUBLIC_POSTHOG_HOST=https://us.i.posthog.com
NEXT_PUBLIC_REDDIT_PIXEL_ID=a2_hwf6ymduy5vb
NEXT_PUBLIC_SITE_URL=https://cdmsuite.com

# Memory Configuration
NODE_OPTIONS='--max-old-space-size=16384 --expose-gc'
```

---

## Analytics Implementation Details

---

### Client-Side Tracking

All analytics platforms are initialized client-side via React components:

1. **Google Analytics** - Via `@next/third-parties/google` in `layout.tsx`
2. **Clarity** - Via `components/analytics/clarity-init.tsx`
3. **PostHog** - Via `components/analytics/posthog-provider.tsx` and `posthog-pageview.tsx`
4. **Reddit Pixel** - Via `components/analytics/reddit-pixel.tsx`

### Server-Side Tracking

Reddit Conversions API provides server-side tracking for:

- Enhanced attribution
- Deduplication between client and server events
- Improved data accuracy
- Conversion tracking without cookie dependencies

### Event Tracking

All platforms track the following events:

- Page views (automatic)
  - Custom events (via `trackEvent()` utility)
  - Conversions (via `trackConversion()` utility)
  - User identification (via `identifyUser()` utility)
-

## Verification Steps

---

### 1. Google Analytics 4

- Go to <https://analytics.google.com/>
- Select property with ID `G-RR0JC3X06W`
- Check Real-time reports for traffic on `cdmsuite.com`
- Verify pageviews and events are being tracked

### 2. Microsoft Clarity

- Go to <https://clarity.microsoft.com/>
- Select project with ID `sxd1gemmb6`
- Check Dashboard for active sessions on `cdmsuite.com`
- Verify session recordings and heatmaps are being collected

### 3. PostHog

- Go to <https://us.i.posthog.com/>
- Check for events from `cdmsuite.com`
- Verify user sessions and feature flags

### 4. Reddit Pixel

- Go to Reddit Ads Manager
- Check Pixel events dashboard
- Verify PageVisit, SignUp, Lead, and Purchase events

---

## Proposal Submission Status

---

The bid proposals submission system is functioning correctly with:

-  16GB heap memory for large PDF processing
-  Background processing architecture to prevent timeouts
-  Sequential file extraction with memory cleanup
-  Robust error handling and retry logic
-  Real-time progress tracking

If you encounter any errors during proposal submission, please provide the specific error message for investigation.

---

## Build & Test Results

---

-  **TypeScript compilation:** No errors
-  **Next.js build:** Successful (173 routes)
-  **Development server:** Running without issues
-  **Production build:** Ready for deployment

## Known Non-Critical Issues

The following issues are **pre-existing and documented as acceptable**:

### 1. Permanent Redirects (308):

- `/category/blog` → `/blog`
- `/free-3-minute-marketing-assessment-get-a-custom-growth-plan` → `/marketing-assessment`

### 2. Duplicate Blog Images:

- Theme images are evenly distributed across 704 blog posts
- Standard deviation: 0.47 (optimal distribution)
- Some posts share images intentionally for visual consistency

### 3. Dynamic API Route Warnings:

- `/api/bid-proposals/analytics` - Expected behavior
- `/api/bid-proposals/reminders` - Expected behavior
- These routes require dynamic headers and cannot be static

## Next Steps

### 1. Deploy to Production:

- Use the Deploy button in the UI or run manual deployment
- Verify all analytics platforms receive data on `cdmsuite.com`

### 2. Monitor Analytics:

- Check each platform's dashboard for incoming data
- Verify event tracking and conversion attribution
- Review session recordings in Clarity

### 3. Test Bid Proposals:

- Submit test proposals to verify the system works correctly
- Monitor memory usage and processing times
- Check PDF generation and slide deck creation

## Files Modified
