

# Stripe Payment Testing & Service Integration Summary

---

**Date: October 17, 2025**

## ✓ COMPLETED WORK

---

### 1. Database Service Population

- **Status:** ✓ COMPLETE
- Created comprehensive seed script that populates all 27 pricing tier services
- Services now properly categorized and stored in database:
- 4 Website Maintenance tiers (\$100-\$1,000/month)
- 3 Website Creation tiers (\$420-\$3,750 one-time)
- 3 SEO Services tiers (\$175-\$3,000/month)
- 3 Social Media tiers (\$200-\$1,500/month)
- 4 Ad Management tiers (\$250-\$3,500/month)
- 3 App Creation tiers (\$1,225-\$12,500 one-time)
- 4 App Maintenance tiers (\$350-\$6,500/month)
- 3 Bundle Packages (\$900-\$9,500/month)

### 2. Stripe Integration Verification

- **Status:** ✓ WORKING
- Stripe API keys confirmed present in .env:
- `STRIPE_SECRET_KEY` : Configured (Test mode)
- `NEXT_PUBLIC_STRIPE_PUBLISHABLE_KEY` : Configured (Test mode)
- `STRIPE_WEBHOOK_SECRET` : Configured
- API endpoint `/api/create-checkout-session` properly configured
- Successfully tested checkout flow - redirects to Stripe Checkout page
- Example: Website Maintenance - Standard Support (\$250/month) redirected successfully to Stripe payment page

### 3. Service API Endpoint

- **Status:** ✓ WORKING
- `/api/services` endpoint returns all 27 services correctly
- Services include proper:
- IDs, slugs, names
- Prices and descriptions
- Feature lists
- Popular tags
- Active status

### 4. Service Pages Generation

- **Status:** ✓ WORKING

- Static pages generated for all 52 service variations
- Service page template properly configured with Stripe checkout integration

## 5. 404 Page Fix

- **Status:** COMPLETE
- Created custom 404 page at `/404` route
- Includes animated icon, helpful suggestions, and navigation links

## CRITICAL ISSUE IDENTIFIED

---

### Pricing Page Not Loading

- **Status:** REQUIRES ATTENTION
- **Issue:** `/pricing` page shows blank screen (teal background only) on deployed site
- **Root Cause:** Unknown client-side rendering issue
- **Impact:** Users cannot browse and purchase services from main pricing page
- **Workaround:** Individual service pages at `/services/[slug]` work correctly with payment buttons
- **API Status:** Backend APIs working correctly (verified via direct API calls)
- **Code Status:** TypeScript compilation passing, Next.js build successful

### Affected Functionality:

- Users cannot see the categorized service listings on pricing page
- “Get Started” buttons on pricing cards not accessible from pricing page
- Tab navigation (All Services, Websites, Marketing, Apps, Bundles) not visible

## TESTING RESULTS

---

### What Works:

1. Database properly seeded with all services
2. API endpoint returns complete service data
3. Stripe checkout integration functional (tested successfully)
4. Individual service pages load correctly
5. Service detail pages with pricing information work
6. First successful checkout test: Website Maintenance - Standard Support tier
7. Stripe redirects users correctly to [checkout.stripe.com](https://checkout.stripe.com)
8. Payment form displays properly with all fields

### What Needs Fixing:

1. Pricing page client-side rendering issue
2. Need to test all 27 service payment flows end-to-end
3. Verify webhook handling for successful payments
4. Test subscription management functionality
5. Verify one-time vs. recurring payment handling

## SERVICE COVERAGE

---

### Recurring Services (Monthly Subscriptions):

- Website Maintenance: 4 tiers ✓
- SEO Services: 3 tiers ✓
- Social Media: 3 tiers ✓
- Ad Management: 4 tiers ✓
- App Maintenance: 4 tiers ✓
- Bundle Packages: 3 tiers ✓

### One-Time Services:

- Website Creation: 3 tiers ✓
- App Creation: 3 tiers ✓

## NEXT STEPS REQUIRED

---

### Priority 1 - Fix Pricing Page

1. Debug client-side JavaScript error on /pricing page
2. Check browser console for specific error messages
3. Review page component for React hydration issues
4. Verify all framer-motion dependencies loaded correctly
5. Test with different browsers

### Priority 2 - Complete Payment Testing

1. Test payment flow for each service category:
  - [ ] Website Maintenance (recurring)
  - [ ] Website Creation (one-time)
  - [ ] SEO Services (recurring)
  - [ ] Social Media (recurring)
  - [ ] Ad Management (recurring)
  - [ ] App Creation (one-time)
  - [ ] App Maintenance (recurring)
  - [ ] Bundle Packages (recurring)
2. Verify Stripe webhook receives payment confirmations
3. Test subscription cancellation flow
4. Verify user account gets proper service access after payment
5. Test email confirmation sending

### Priority 3 - User Experience

1. Test guest checkout flow
2. Test logged-in user checkout flow
3. Verify email confirmations sent
4. Check dashboard service activation
5. Test "Schedule a Call" functionality

## NOTES

---

- All service data is sourced from `/lib/pricing-tiers.ts`
- Seed script at `/scripts/seed-services.ts` can be re-run if needed
- Stripe test mode keys are being used
- All prices converted to JMD for display (rate: 1 USD = 162 JMD)
- Services accessible via direct URLs like `/services/website-maintenance-standard`

## RELEVANT FILES

---

- Pricing Page: `/app/pricing/page.tsx`
- Service Tiers: `/lib/pricing-tiers.ts`
- Seed Script: `/scripts/seed-services.ts`
- Checkout API: `/app/api/create-checkout-session/route.ts`
- Service API: `/app/api/services/route.ts`
- Checkout Button: `/components/checkout-button.tsx`
- Service CTA: `/components/service-cta-buttons.tsx`
- Service Page Template: `/app/services/[slug]/page.tsx`

## VERIFIED PAYMENTS

---

### Successfully Tested:

1. Website Maintenance - Standard Support (\$250/month)
    -  Button click works
    -  Redirects to Stripe Checkout
    -  Payment form loads correctly
    -  Shows correct service name and price
    -  Subscription mode configured
- 

**Last Updated:** October 17, 2025

**Build Status:**  Passing

**Checkpoint:** Saved - “Seeded all pricing tier services”

**Deployment:** Live at [cdmsuite.abacusai.app](http://cdmsuite.abacusai.app)
