Service Pages & Dashboard Updates Summary

Overview

This update removes the problematic Stripe pricing tables from service pages and implements a comprehensive dashboard-based service purchase system.

Changes Made

1. Service Pages Updated ✅

Ad Management Page (`/services/ad-management`)

- **Removed:** Stripe pricing table widget (was causing hydration errors)
- **Added:** Clean, simple pricing cards with three tiers:
- **Starter:** $997/month - Up to $5K ad spend, 2 platforms
- **Growth:** $1,997/month - Up to $15K ad spend, 3+ platforms (Most Popular)
- **Scale:** $3,997/month - Unlimited ad spend, all platforms
- **CTA:** All "Get Started" buttons redirect to login → dashboard services

SEO Services Page (`/services/seo`)

- **Removed:** Stripe pricing table widget
- **Added:** Three-tier pricing display:
- **Foundation:** $797/month - Technical SEO, keyword research
- **Growth:** $1,497/month - Content optimization, link building (Most Popular)
- **Enterprise:** $2,997/month - Content creation, dedicated manager
- **CTA:** All buttons redirect to dashboard services

2. New Dashboard Services Page ✅

Location: `/dashboard/services`

- **Authentication:** Protected route, requires login
- **Features:**
- Tabbed interface for service categories:
  - 📈 Ad Management
  - 🔍 SEO Services
  - 📱 Social Media Marketing
  - 🌐 Web Development

Service Catalog:

Ad Management (3 tiers)
- Starter ($997/mo) - Small campaigns
- Growth ($1,997/mo) - Scaling businesses
- Scale ($3,997/mo) - Enterprise campaigns

SEO Services (3 tiers)
- Foundation ($797/mo) - Basic SEO

- Growth ($1,497/mo) - Advanced SEO
- Enterprise ($2,997/mo) - Full SEO service

Social Media (3 tiers)
- Starter ($697/mo) - 2 platforms, 12 posts
- Professional ($1,297/mo) - 3+ platforms, 20 posts
- Enterprise ($2,497/mo) - All platforms, daily content

Web Development (3 tiers)
- Basic Website ($2,997 one-time) - 5 pages
- Business Website ($5,997 one-time) - Up to 15 pages
- Enterprise Website ($9,997 one-time) - Custom application

Purchase Flow:

1. User clicks "Purchase Now" on any service
2. Creates Stripe checkout session via API
3. Redirects to Stripe for secure payment
4. Returns to success page after purchase

3. Dashboard Navigation Updated ✅

Added **"Services"** menu item to dashboard sidebar:
- Icon: Shopping bag (🛍️)
- Position: Second item (after Dashboard, before Projects)
- Accessible to all users (no tier restrictions)
- Makes service browsing seamless for logged-in users

4. User Flow

From Public Pages:

```
Service Page (SEO/Ads)
  → View pricing
  → Click "Get Started"
  → Login/Signup
  → Redirect to /dashboard/services
  → Browse all services
  → Purchase
```

From Dashboard:

```
Dashboard Sidebar
  → Click "Services"
  → Browse categories
  → Select tier
  → Purchase → Stripe Checkout
```

Technical Details

Files Modified:

1. `/app/services/ad-management/page.tsx` - Removed Stripe, added pricing cards
2. `/app/services/seo/page.tsx` - Removed Stripe, added pricing cards

3. `/components/dashboard/dashboard-layout.tsx` - Added Services navigation item

Files Created:

1. `/app/dashboard/services/page.tsx` - Server component, auth check
2. `/app/dashboard/services/services-client.tsx` - Client component with full UI

APIs Used:

- `/api/create-checkout-session` - Existing Stripe checkout endpoint
- Session management - NextAuth for user authentication

Benefits

✅ **No More Hydration Errors:** Removed client-side Stripe widget
✅ **Better UX:** Logged-in users can purchase from dashboard
✅ **Consistent Experience:** All services in one place
✅ **Mobile Optimized:** Responsive pricing cards and tabs
✅ **Flexible:** Easy to add new services or tiers
✅ **Secure:** Stripe handles all payment processing

Next Steps (Optional Enhancements)

1. **Active Services Dashboard:** Show purchased services in a dedicated section
2. **Service Management:** Allow users to upgrade/downgrade plans
3. **Usage Tracking:** Display service usage metrics
4. **Support Integration:** Direct chat for service-specific questions
5. **Recommendations:** Suggest services based on user tier/behavior

Testing

All pages tested and working:
- ✅ TypeScript compilation passes
- ✅ Next.js build successful
- ✅ No console errors
- ✅ Responsive on mobile and desktop
- ✅ Authentication flows work correctly

Deployment

The changes are now live and ready for deployment:
- Build: Successful
- Checkpoint: Saved
- Status: Ready to deploy
